

Systems Optimization for Power Utilities and Industrial Plants

Working together with a strategic team
to help utility and industry
clients resolve complex challenges with:

- Boiler and Combustion Performance
- Energy Efficiency
- Fuels Flexibility
- Plant Reliability
- Plant Process
- Metallurgical Failures
- Environmental Compliance

Our goal is to link our client's technical
and organizational silos through an
integrated and comprehensive
approach to achieving
sustainable, reliable, efficient and
environmentally sound operations

- Assessments • Inspections
- Benchmarking • Modeling • Monitoring
- Training & Education • Outage Planning
- Optimization • Preservation
